TIME SAVING

# Selection guide for Eaton GO WIRELESS controls

Design your customer's home with wireless switches saving time and offering additional value to your customers

Smarter in 1-3 simple steps...

# GO WIRELESS, it is easy, it is fast, clean and flexible!

START

## Step 1

Select your application(s)

Pre-programmed  
(No-training required)

Select one or more application(s)

Switching a (group of) light(s)/ socket(s) 10A

Wireless Switch All

Add a control point to an existing mechanical switch (10A)

Wireless Second Switch

Dimming a (group of) light(s)/ socket(s) 250W

Wireless Dim All

Control a shutter/blind/shade?

Wireless Shading

Control mechanical ventilation

Wireless Ventilation

Control an electrical heating

Wireless Heating

## Step 2

(Optional)

Add additional control points to the application(s)

Program in 3 clicks  
( <1 min video instructions)

Do you need (an) additional wireless switch(es) to control the light/socket/shutter or ventilation?

YES

Select the number of switches you need

CPAD-00/193

CPAD-00/194

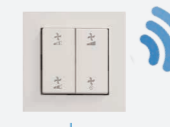

control 2 devices\*

CPAD-00/195

control 4 devices\*

CPAD-00/218

Mechanical ventilation

NO

Do you need a Master switch (ALL ON/OFF: control a group of lights/sockets/shutters) or a 'Panic' switch? (control a group of lights)

YES

CPAD-00/193

NO

Do you want to add automated functions to the selected applications?

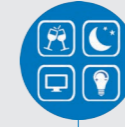

App control

Presence simulation to scare burglars off

Light scenes

Add timers to each application

YES

CHCA-00/01

You can add more applications and functions at your own pace adding xComfort components

## Step 3

(Optional)

Add automated functions

Program with software tool  
(Join our training)

\*lights/sockets or shutters

## Go Wireless packages content

- **Wireless Switch All** – Installs quickly and easily, wherever your customers want a switch to control lights or appliances. Ideal for improving functionality when existing switches are inconveniently located. Comes with one actuator and a wireless switch.
- **Wireless Second Switch** – For wherever customers want to control a light or appliance from more than just one existing switch in their home. By mounting the actuator behind an existing mechanical switch, you can easily mount a second, more convenient wireless switch in any location where you need it. Wireless Second Switch ensures seamless operation of a light or appliance from two control points.
- **Wireless Dim All** – A wireless dimmer that smoothly dims all dimmable light bulbs, controllable from wherever your customers want in their homes. Mounted in minutes, Wireless Dim All makes it simple to install dimming controls where they need it. More flexible than ‘traditional’ dimmers, Wireless Dim All includes one dim actuator and a wireless switch.
- **Wireless Shading** – Add greater comfort and convenience for your customers with wireless switches to control electric shutters, blinds, sunshades or curtains. Quick to install on any surface, the package comes with one blind actuator and a wireless switch.
- **Wireless Ventilation** – Quickly install a wireless switch to control ventilation speeds wherever customers want. Mounts easily on any surface in the home.
- **Wireless Heating** – The Room Touch Controller measures the room temperature and humidity and enables your customers to control their electric heating through the touch screen connected wirelessly to an actuator. The actuator can be connected to electric heating or infra-red panels, electric heating cables for floor/wall heating/ frost-protecting water pipes or heating foils. Apart from the option of manual control, the Room Touch Controller features four programmable temperature set points, as well as a weekly timer (with six control points per day), which can autonomously adjust the temperature according to your customers’ needs.

## What will I find in the package?

Consumer Folder

Quick Installation Card

- Reliable bi-directional wireless control
- Battery lifetime: 10 years (TYP)
- Compatible with most 55mm frames
- Easy to install without dust and dirt
- Pre-programmed, working out of the box
- Extendable with additional switches and components
- Wireless Switch, can be placed on any surface
