

HSM-VALVE-0505: Smart monitoring shut-off valve 2x euro cone 3/4'

Commercial information

Protect your home from water damage with the Henco Smart Monitoring Valve, a smart automatic water shut-off valve that detects leaks in real time. This compact device is easy to install on your water pipes and works autonomously.

For remote control and leak notifications, simply connect it to Wi-Fi and monitor via the Henco app. Stay safe from leaks, micro-leaks, and pipe bursts, with the ability to shut off water even in emergencies.

Key Features:

- Real-time leak detection
- Automatic water shut-off
- Wi-Fi connectivity for remote monitoring
- Easy installation in tight spaces

Basic unit dimensions

Height	85 mm
Length	110 mm
Width	71 mm
Net weight	0.720 kg

Certificates

Applications

Potable water, Heating, Cooling, Sanitary

Solutions

Building installations

Technical characteristics

Signal output	✘	Supply voltage	5 Volt
Electrical connection	Connection cable with plug	Number of contacts	0
With wired control unit	✘	Time delay	90 Second
With wire break detection	✘	Number of detectors	0
Communication medium wireless	✔	Sensor length	110 Millimetre
DIN-rail mounting reinforcer	✘	Width sensor	71 Millimetre
Material valve	Brass	Detector height	85 Millimetre
Connection	External thread	Number of connectable valves	0
Connection size	3/4 inch		
Type approval according to BBR/EKS	✔
