Auslösekenntlinie (aus kaltem Zustand)  
Für Nennströme (3-polig) zwischen dem 3- und 8-fachen des Einstellwertes beträgt die Toleranz der Auslösezeit  $\pm 20\%$   
Gültig für Geräte mit Produktionsdatum ab 15183 / 2.7.2015.  
Tripping characteristic (from cold state)  
For currents (3-pole) between 3 and 8 times the current setting the tolerance of the tripping time is  $\pm 20\%$   
Valid for devices with production date from 15183 / 2.7.2015.
