

PRODUCT DATASHEET

Type: BHK-63/119
Art. Nr.: 40543

9120061394069

Short description

Electric bathroom heater, white, 800W, 230V

Product Description

The BHK bathroom radiator is used to heat bathrooms and towels. The radiator has an attractive design with no visible weld seams, is frost-proof down to -20 °C and is filled with heat transfer fluid. The thermostat regulates the surface of the radiator in 2 stages (45 °C and 60 °C). The device has an on/off switch with LED display and a 2-hour timer function. The BHK-TH radio control is optionally available for weekly and daily programs as well as temperature drop detection - making it compliant with ecodesign guidelines. Device depth: 85 mm, protection class: IP X5 protection class I, color: traffic white RAL 9016, plug connection cable: 1.5 m right, CE compliant.

ETIM characteristics

Radiator design	Straight	Number of tubes	22
Type of collector	Other	Max. input power electric heating	800 Watt
With console	✗	Max. input power fans	0 Watt
Swivelling	✗	Supply voltage	230 230 Volt
Shape of radiation tube	Rectangular	Frequency supply voltage	50 50 Hertz
Material	Steel	Connection cable length	1.5 Metre
With fan	✗	Width	630 Millimetre
Electrical connection	Connection cable with plug	Height	1190 Millimetre
Position control panel	Other	Depth	85 Millimetre
Suitable for wireless remote control	✓	Weight	14 Kilogram
With remote control	✗		
Power control	Electronic		
With time switch clock	✗		
Colour	White		
Degree of gloss	Glossy		
Degree of protection (IP)	Other		
Protection class according to IEC 61140	I		
Digital indication	✗		
Suitable for bus connection	✗		
Programmable	✗		
Adaptive (self-learning)	✗		
Consumption indication	✗		
Operation by app	✗		
With mounting material	✓		
Type approval according to BBR/EKS	✗
