

Eaton Intelligent Power Manager

Integrated power management software for virtual environments

Intelligent Power Manager (IPM) disaster avoidance software, part of our Brightlayer Data Centers suite, provides the tools needed to monitor and manage power equipment in physical or virtual environments to keep IT devices running—typically 25 or fewer UPSs and/or PDUs—during a power or environmental event. Our [Distributed IT Performance Management \(DITPM\)](#) software provides similar functionality for organizations needing to monitor and manage more devices.

IPM is a web-based solution that increases system uptime and data integrity by allowing you to remotely monitor, manage and control devices on your network. IPM provides a solution that is easy to use, maintains business continuity and allows you to do more with less.

Achieve more with less by reducing capital expenses

Enables intelligent load shedding

Increase system uptime while extending battery runtime by suspending non-critical virtual or physical loads.

Reduces batteries and associated maintenance

Use fewer batteries for a given battery backup time, which reduces battery replacement costs.

Supports environmental, social and corporate governance (ESG) compliance

Consume less energy and reduce your footprint.

Automate business continuity by minimizing operating expenses

Automates IT shutdown

Gracefully shut down IT equipment per your organization's order requirements.

Provides peace of mind

Migrate critical loads and achieve safe and quick recovery from power or environmental outages.

Streamlines implementation

Host IPM within your cluster—no additional IT equipment required.

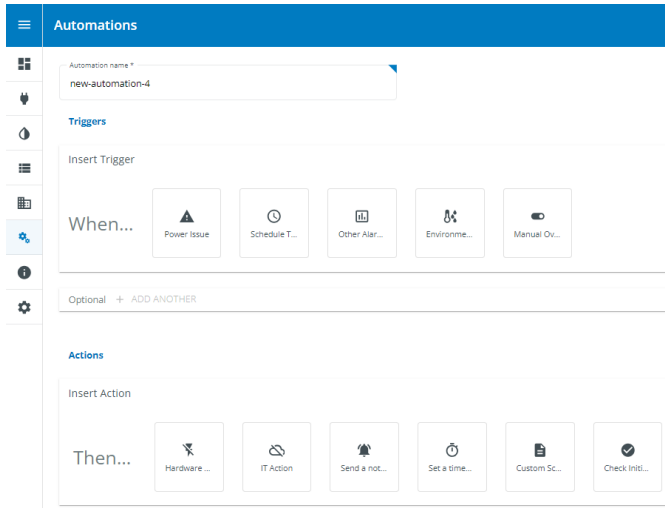

Powering Business Worldwide

Eaton alliance partners

Eaton understands that power protection is only one aspect of IT environments. By partnering with the industry's leading global IT providers, Eaton helps harness the power of data centers and distributed IT environments. Together with alliance partners, Eaton aims to solve even the most complex IT challenges, while continuing to provide the ultimate in power protection.

Power outages cost both time and money
