

MODEL 725G / 725F SUCTION DIFFUSER

For pressure rating, listing, and approval information, refer to data sheet or visit SHURJOINT website www.shurjoint.com for details or contact your SHURJOINT representatives.

The Model 725G Suction Diffuser features a space saving design, ductile iron body and integral vanes that effectively reduce turbulence and provide optimum flow conditions at the inlet side of the pump.

The suction diffuser's inlet is supplied with a grooved end to AWWA C606-04. The 725G can be connected directly to grooved end pump or to a flanged end pump if used in combination with a Model 7041 flange or a Model 7180 universal flange adapter.

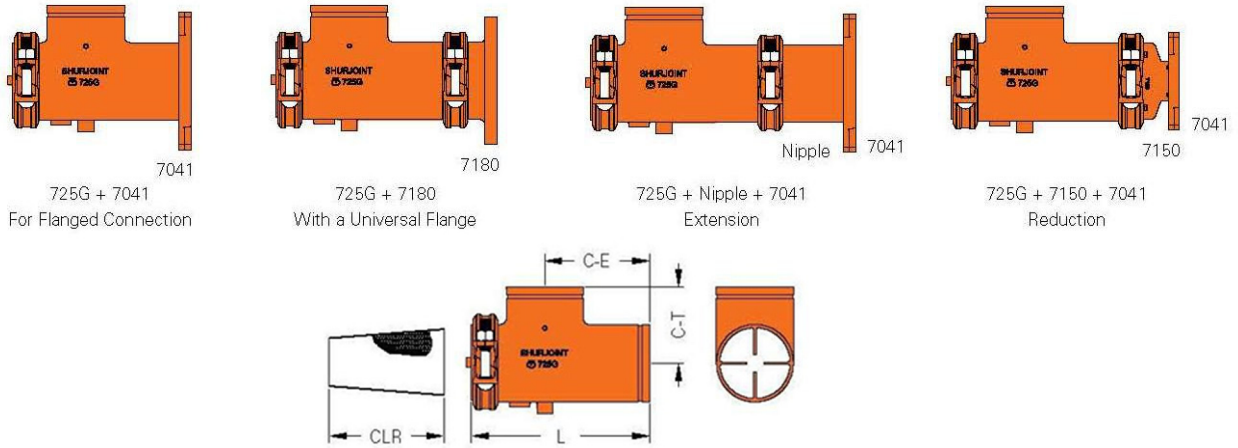

If a distance adjustment is required a nipple adapter can be used between the pump and the suction diffuser. The 725G also allows for a reduction on the outlet when used in combination with a Model 7150 concentric reducer and a Model 7041 flange.

The Model 725G is supplied with a 304 stainless steel running strainer and a disposable fine mesh screen to protect the pump during start-up operation.

material specification

- **Body:**
Ductile Iron to ASTM A536, Gr. 65-45-12, or segment welded steel to ASTM A53 and/or A204.
- **End Cap & Coupling Segments:**
Ductile Iron to ASTM A536, Gr. 65-45-12.
- **Surface Finish:**
Orange color painted.
 - Epoxy coated in black

- **Rubber Gasket:**
Grade "E" EPDM (Color code: Green stripe) Good for cold & hot water up to +230°F (+110°C). Also good for services for water with acid, water with chlorine or chloramines, deionized water, seawater and wastewater, dilute acids, oil-free air and many chemicals. Not recommended for petroleum oils, minerals oils, solvents and aromatic hydrocarbons.
Maximum Temperature Range: -30°F (-34°C) to +230°F (+110°C) *.
*EPDM gaskets for water services are not recommended for steam services unless couplings or components are accessible for frequent gasket replacement.
 - Other options: Grade "T" - Nitrile
Grade "O" - Fluoro-elastomer,
Grade "L" - Silicone
Grade "E-pw" - EPDM NSF61
- **Bolts & Nuts:**
Heat treated carbon manganese steel track bolts to ASTM A449-83a (or A183 Gr. 2), minimum tensile strength 110,000 psi (758 MPa), Zinc electroplated, with heavy-duty hexagonal nuts to ASTM A563.
- **Screen:**
Stainless steel Type 304 to ASTM A240. Factory's standard screen perforation is 1/8" (3.2 mm). Other perforations are available upon request.
- **Start-up Screen:**
Stainless steel Type 304, 20 mesh screen.

Model 725G Suction Diffuser

*Working pressure is based on connection with roll- or cut-grooved standard wall carbon steel pipe.

1. SJ-300N Butterfly Valve
2. 725G Suction Diffuser
3. 7041 Flange Adapter
4. 7150 Concentric Reducer
5. SJ-915 Dual Disc Check Valve
6. 7707 Flexible Coupling
7. Z07 Rigid Coupling
8. 7721 Mechanical Tee with Pressure Gage

MODEL 725F SUCTION DIFFUSER (Fabricated)

Shurjoint offers large diameter suction diffusers with reduced outlet sizes that are made of segment welded steel. The factory standard #725F suction diffusers come with a grooved inlet and flanged outlet to ANSI Class 125 /150, PN10, or JIS 10K.

* Working pressure is based on connection with roll- or cut-grooved standard wall carbon steel pipe.

When ordering, specify the desired flange drilling.

Flow Data - Cv Values

Values for flow of water at +60°F (+16°C).

$$Cv = \frac{Q}{\sqrt{\Delta P}}$$

Where: Cv = Flow coefficient
 Q = Flow (GPM)
 ΔP = Pressure drop (psi)

Model #725G Cv (Fully Open)					
Valve Size	Actual O.D.	Cv Value	Valve Size	Actual O.D.	Cv Value

MODEL 725G / 725F SUCTION DIFFUSER
 Rev.20250123

General note

- Maximum Working Pressure (CWP) listed is the maximum cold water pressure for general piping services tested to ASTM F1476 and or AWWA C606 methods. Figures listed are based on roll- or cut-grooved standard wall carbon steel pipe. For other pipe schedules or pipe materials, contact Shurjoint for additional information.
- Max. End Load is calculated based on the maximum working pressure (CWP).
- Listed and or Approved Pressures are pressure ratings for fire protection systems, tested and approved by various approval bodies. Please always refer to the latest approval data posted on the Shurjoint website.
- Field Joint Test: For one time only the system may be tested hydrostatically at 1½ times the maximum working pressure listed (AWWA C606 5.2.3).
- Warning: Piping systems must always be depressurized and drained before attempting disassembly and or removal of any components.
- The 10 Year Limited Warranty applies to manufacturing defects only and does not cover severe service/temperature applications or wear parts.
- Shurjoint reserves the right to change specifications, designs and or standard without notice and without incurring any obligations.
