Feedthrough terminal block, 226 Series, operating tool

Feedthrough terminal block (item number 226-111) simplifies electrical installations. Strip lengths must be between 9 and 10 mm when connecting conductors to feedthrough terminal block. This product features two conductor terminals and utilizes CAGE CLAMP® as well as a solder connection. Our CAGE CLAMP® connection provides a reliable and maintenance-free way to connect all types of conductors. You do not need to prepare the conductor in any way, such as crimping ferrules. The dimensions are (6 x 36.5 x 26) mm (width x height x depth). Feedthrough terminal block is suitable for conductor cross sections ranging from 0.08 mm² to 4 mm².

Tin is used for coating the contact surfaces.
