

THE VERSATILE CLICK SYSTEM FOR FLAT ROOFS

FLATFIX FUSION

www.esdec.com

THE ADVANTAGES OF FLATFIX FUSION

FLEXIBLE AND EASY

- Completely modular system
- Flexible installation: Easy to build around obstacles
- Aesthetic lightweight system
- Single or dual setup
- Suitable for residential and commercial projects
- Strong and durable clamping force with metal insert in high and low base
- For panels up to 1150mm wide and 2190mm long

RELIABLE

- Aerodynamic design with rounded corners and smooth material finish
- Robust system thanks to connectors parallel and perpendicular to the panels
- · Wind deflectors designed for maximum safety
- Tested to international standards
- 20-year warranty

• For every type of roof

- Roof support with movable connectors
- Unique thermal decoupling prevents damage to roof material
- Optimum point pressure due to distributed ballast
 Integrated grounding and bonding in high and low
- base in accordance with IEC 60364 seriesCable exits and cable guides (optional) for safe cable
- management

EASY TO INSTALL

- User-friendly click system
- Optimizer ready cable clip for easy attachment and safe cable removal
- Grounding clamp can easily be incorporated onto the end clamp
- Optimizer clip can also be used for most micro inverters
- For the most common solar panels (angle of inclination 13°)
- Renewed end clamps for even more powerful and easier installation

COMPLETE AND FLEXIBLE INSTALLATION ON EVERY ROOF

FlatFix Fusion is the modular and flexible mounting system for solar panels on small and medium-sized roofs. Its modular design enables a customized configuration to be created for every roof. Installers can, for example, easily build around obstacles – such as chimneys – with this system. FlatFix Fusion can be set up either in dual or single configuration. FlatFix Fusion is a 100% Dutch product that has proven itself for years. In 2021, the system received an update of a number of components, which not only makes installation even easier for the installer, but also further increases the safety of the roof and the PV system. It is now possible to install solar panels up to 1150mm wide and 2190mm long with FlatFix Fusion.

Easy to install

Esdec was founded by professional installers, the interest of the installer always come first when designing our products. Simplicity and flexibility were therefore the starting points in the design of our FlatFix Fusion system. Smart click connections enable the system to be assembled quickly. Handy features on the clamps and on the wind deflectors make installation even easier.

Safety for the roof

The different components are connected using fast-click connectors. The roof supports with movable connectors allow the system to move (expand and shrink) to prevent damages of the roof material. As a result, the thermal movements of the building are not transmitted to the PV system and vice versa. The 2021 upgrade includes a safe and aesthetic solution for cable management: cables are guided through the wind deflectors with a cable exit guide.

Reliability

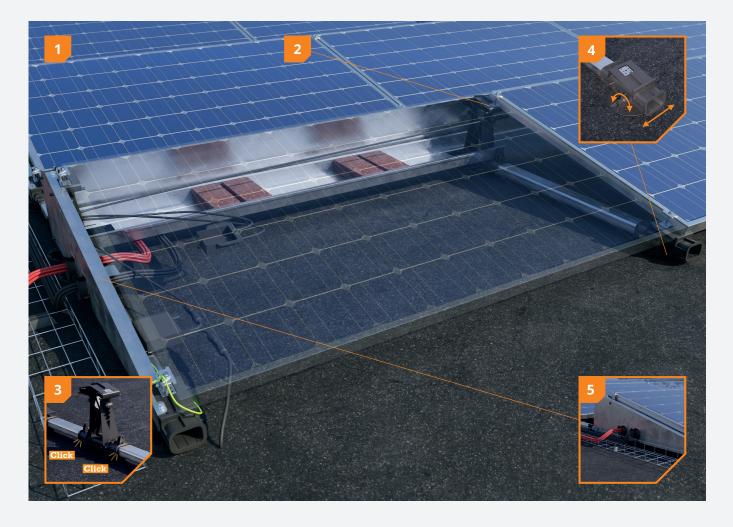

The patented FlatFix Fusion system has been extensively tested on fire safety, wind resistance and corrosion. With even stronger and durable clamping force with a metal insert in the high and low base. FlatFix Fusion is a highquality mounting solution. It complies with the strictest international standards and comes with a 20-year warranty.

ADVANTAGES FOR THE INSTALLER

- Modular mounting solution with click connection
- Flexible installation on any roof
- Integrated grounding and equipotential bonding
- Ease of installation with optimizer clip with integrated cable clip

ADVANTAGES FOR THE END USER

- ✓ Roof-specific configuration
- Safe and reliable
- ✓ No damage of the roof material
- 🤣 20-year product warranty

Strong, lightweight system

The different components enable flexible row lengths. This makes it possible to create a roofspecific setup and, for example, to build around obstacles.

Easy maintenance

FlatFix Fusion is made of strong, lightweight materials. With the high and low base, with a metal insert, the clamping force remains optimal after removal and reinstallation of panels.

3 Unique click connection

The revolutionary, unique click connection makes the FlatFix Fusion a very quick and easyto-install mounting solution.

With thermal decoupling

The roof supports with movable connectors give the system space to expand thermally without damaging the roof material.

5 With integrated cable management

The cables and plugs of the solar panels can be safely and easily attached to the mounting solution. With the cable exits in the wind deflectors and with the cable exit guides, cables can be stowed and guided in a safe way.

FlatFix Fusion Portrait

Extension or carport?

FlatFix Fusion is ideal for small roofs. While in a landscape orientation you can only fit 3 panels on an extension of approximately 2.5 meters, with the portrait orientation you can fit as many as 5. Would you like to see whether your project can make use of this roof optimization? Check out our calculator and immediately download your packing slip and installation plan!
