

Eaton 9PX/SX 8/11kVA Gen2

Representative product	Eaton 9PX8KIRTNG2 Product Category: Uninterruptible Power Systems (UPS) with energy storage						
Description of the product	Eaton 9PX/SX 8/11kVA Gen2 is a compact UPS designed to protect mission-critical applications. Thanks to the use of new power electronics components (Silicon Carbide) 9PX/SX Gen 2 is providing the highest level of energy efficiency, in a very compact 4U form factor. Typical applications include protection of the IT infrastructure, Medical equipment, Control systems.						
Product specifications	Power VA: 8000VA / 8000W UPS Configuration: Single UPS with Bypass UPS performance classification: UPS - VFI $\leq$ 10kW (Online double conversion) Technology of the energy storage system: Valve regulated lead acid batteries (VRLA) Product dimensions (H*W*D) : 174*440*725 mm Mass of the equipment: 8.02E+01 kg (Unit - 7.75E+01 kg + Accessory - 2.77E+0 kg) Power factor: 1 Reference service life (Years) for all models: 10						
Homogeneous Environmental Families Covered	The PEP concerns product offerings from Eaton - 9PX 8-11kVA Gen2 as mentioned below, DC is double conversion mode, HE is high efficiency mode.						
	Product Family	Product Number	Mode	Power (W)	Backup time (min)	UPS efficiency (%)	Packaging mass (kg)

Functional unit	To ensure the supply of power without interruption to equipment with load of 100 watts for a RSL of 1 years, including a backup time capacity of 5 minutes during power shortages						
Declared unit	To ensure the supply of power without interruption to equipment with load of 8000 watts for a RSL of 10 years, including a backup time capacity of 5.4 minutes (at full load condition) during power shortages						
Company information	Eaton Industries (France) SAS 110 Rue Blaise Pascal 38330 Montbonnot Saint Martin France Email: productstewardship-es@eaton.com

Substance Assessment

The representative product is compliant with the EU-RoHS Directive (2011/65/EU) by application of exemptions and the product contains lead (Pb) in batteries, copper alloy and electronics, which is listed as Substance-of-Very-High-Concern (SVHC) on the Candidate List of the EU-REACH Regulation (1907/2006/EC).

Additional Environmental Information

Manufacturing	The reference product is assembled at an Eaton plant (LianZheng Electronic (ShenZhen) Co., Ltd.) holding management system certifications according to ISO 14001 standards.
Distribution	Eaton is committed to minimizing weight and volume of product and its associated packaging material with focus to optimize transport efficiency.
Installation	During installation of the product only standard tools are needed, which do not require any additional energy source and no waste other than the obsolete product packaging is generated during this step.
Use	Product consumes energy during useful life which is considered to be 10 years (as per actual designed life). During the reference service life of product, product requires one battery replacement for maintenance.
End of life	The recyclability rate of the overall product is 71.95% if properly dismantled prior to further processing at a recycling facility. The rate is calculated based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental Impacts

The calculation of the environmental impacts is the result of the Product's Life Cycle Analysis in accordance with ISO 14040/44, covering the entire lifecycle, i.e., "Cradle-to-Grave" including the following life cycle phases: production, distribution, installation, use and end of life. System modelling was carried out using the commercial LCA software EIME v6.2.4 with database version CODDE-2024-04 - updated on 2024-06-04.

Indicators Set used: PEF EF 3.1 (Compliance: PEP ed.4, EN15804+A2) v2.0

Manufacturing Phase	Product is assembled and prepared for shipment at the Eaton facility, Lianzheng Electronic (Shenzhen) Co., Ltd. Energy model used: Europe, China, Global
Distribution Phase	Since Europe is the major market for the product, following transport scenario is considered for the product from Shenzhen, China Eaton plant to end user for this study. As per PCR 4 (section 2.5.3), 19000km is considered by sea and 1000km by road.
Installation Phase	Product is installed in any European country. Hence, packaging waste treatment is considered in this phase considering country specific statistics as per PSR. Energy model used: Europe

Use Phase	Reference lifetime: 10 years Energy model used: Europe. Usage profile: It has an average energy efficiency of 97.31%. The methodology for the calculation of the electricity consumption is based on Uninterruptible Power Systems (UPS) PSR.				
	Operating loads	25%	50%	75%	100%
	Proportion of Time spent at	0.00	0.30	0.40	0.30
Total energy losses are calculated to be equal to 14054.54 kWh over the 10 years.					
End of life Phase	Product disposed according to European WEEE guidelines. Energy model used: Europe				
Module-D	Module D is calculated according to PCR-ed4-EN-2021 09 06 based on the materials recycled and the modelled end-of-life scenario. It expresses the net benefits and loads beyond the boundaries of the system and are not to be included in the life cycle totals.

All environmental impacts are calculated for the declared unit, then data should be divided by the Factor calculated with below formulas to get functional unit result.

Factor for use stage energy consumption B6:

$$\frac{\text{Declared Unit Power (8000 W)} * \text{Declared Unit Lifetime (10 year)}}{100 \text{ W} * 1 \text{ year}} = 800$$

Factor for all other stages (excepted B6 of use stage):

$$\frac{\text{Declared Unit Power (8000 W)} * \text{Declared Unit Lifetime (10 year)} * \text{Declared Unit Backuptime (5.4 min)}}{100 \text{ W} * 1 \text{ year} * 5 \text{ min}} = 864$$

Environmental Impact for Functional Unit

	HE	0.15	2165.47

Above extrapolation factor needs to be multiplied to declared unit environmental impacts. To get functional unit impacts, the declared unit results of specific product number need to be divided by below factors calculated as per PSR10 section 3.1.3. Below Table represents both DC and HE mode for each product number as the Back-up time remains same for both the modes.

Products	FU factor for other phases (Excluding B6)	FU factor for Use B6
9PX8KIRTNG2 (Reference model)	864.00	800
9PX11KIRTNG2	682.00	1100
9SX8KIG2	560.00	800
9SX11KIG2	418.00	1100
9SX8KIRT4UG2	560.00	800
9SX11KIRT4UG2	418.00	1100
9PX8KIRTNG2 + 9PXEBM240RT3UG2	2432.00	800
9PX8KIRTNG2 + 2*9PXEBM240RT3UG2	4272.00	800
9PX8KIRTNG2 + 4*9PXEBM240RT3UG2	8144.00	800
9PX8KIRTNG2 + 12*9PXEBM240RT3UG2	24160.00	800
9PX8KIRTNG2 + MBP11KIG2	864.00	800
9SX8KIG2 + 1*9SXEBM240G2	560.00	800
9SX8KIRT4UG2 + 1*9SXEBM240RT3UG2	1696.00	800

Disclaimer

This Product Environmental Profile and its content is based on information available to us. It refers to the product at the date of issue. We make no express or implied representations or warranties with respect to the information contained herein.

Registration number:	EATO-00282-V01.02-EN	Drafting rules	PCR-ed4-EN-2021 09 06
Verifier accreditation number:	VH56	Supplemented by	PSR-0010-ed2-EN-2023 12 08
Date of issue	01-2025	Information and reference documents	www.pep-ecopassport.org
		Validity period	5 years
Independent verification of the declaration and data, in compliance with ISO 14025: 2006			
Internal	X	External	
The PCR review was conducted by a panel of experts chaired by Julie ORGELET (DDemain)			
PEPs are compliant with XP C08-100-1:2016 or EN 50693:2019			
The components of the present PEP may not be compared with components from any other program.			
Document complies with ISO 14025:2006 "Environmental labels and declarations. Type III environmental declarations"
