

Welcome to Plejd

Congratulations!

Your home is equipped with smart products from Plejd. The installation is complete and you can easily control the products via the app, wireless products from Plejd or traditional light switches.

Here are a few simple steps to get started:

1. Download the Plejd app on the App Store or Google Play.
2. Create a user account in the app.
3. Connect to your new system by entering your system code.

The Plejd app

The app is a complement to your traditional light switches. It functions as a simple tool for configuring and controlling the products in the Plejd system. The app makes creating and using customized scenes, schedules, and timers easy.

Scenes

With Plejd, you can simplify everyday life at home by customizing and automating scenes. Create scenes that suit different occasions and activate them from your regular light switch or the app.

Astro/time schedule

Let the sunrise and sunset control façade lighting or switch lights on and off at specific times. All our products have built-in astro/time schedule which allow for easy scheduling.

Integrations and remote control

To get even more out of Plejd, you can supplement the system with our Gateway. It enables remote control and integrations with third-party services such as Google Home, Apple HomeKit®, Alexa and Homey.

Expand your Plejd system

Our product range is tailored to meet diverse needs, offering greater benefits than traditional alternatives. Each additional Plejd product integrated into the system multiplies these benefits, creating a more powerful solution.
