Fused disconnect terminal block with a pivoting fuse holder, for (5 x 20) mm glass cartridge fuse, without blown fuse indication (281-611)

Fuse terminal block, 281 Series, CAGE CLAMP®

Easily, quickly and safely connect conductors with this fuse terminal block (item number 281-611). Ensure that the strip lengths are between 9 mm and 10 mm when connecting conductors to this fuse terminal block. This product features conductor terminals and utilizes CAGE CLAMP®. Our highly-rated and maintenance-free CAGE CLAMP® connection makes it easy to connect all conductor types without having to prepare the conductor. For example, you don't need to crimp ferrules. Depending on the type of conductor, this fuse terminal block is suitable for conductor cross sections ranging from 0.08 mm² to 4 mm². It features one level and two clamping points that you can use to connect two potentials. The gray housing is made of polyamide (PA66) for insulation. These function terminal blocks are mounted using DIN-35 rails..

Power Loss

Power loss (max.) $P_{l\,(max.)}$ (note)	When selecting glass cartridge fuses, make sure that the maximum power loss listed below is not exceeded. The power loss is determined according to IEC or EN 60947-7-3/VDE 0611-6 at 23°C. The temperature rise of the terminal block must be checked according to their application and mounting. Higher ambient temperatures represent an additional impact on miniature fuses. Therefore, in such applications, the rated current must be reduced if necessary. More details are available from the manufacturers.

Connectable conductor materials (note)	**Terminating Aluminum Conductors** WAGO Spring-Clamp Terminal Blocks are suitable for solid aluminum conductors up to 4 mm²/12 AWG if WAGO "Alu-Plus" Contact Paste 249-130 is used for termination. "Alu-Plus" Contact Paste Advantages: • Automatically destroys the oxide film during clamping. • Prevents fresh oxidation at the clamping point. • Prevents electrolytic corrosion between aluminum and copper conductors (in the same terminal block). • Provides long-term protection against corrosion. Using terminal blocks with CAGE CLAMP® Spring Pressure Connection Technology, **aluminum conductors must first be cleaned with a blade** and then immediately inserted into the clamping units filled with "Alu-Plus" contact paste. It is also possible to apply WAGO "Alu-Plus" **additionally** on the whole surface of the aluminum conductor before termination. Please note that the nominal currents must be adapted to the reduced conductivity of the aluminum conductors:: 2.5 mm² = 16 A 4 mm² = 22 A

Installation Notes
Conductor termination

CAGE CLAMP® connection
Inserting a conductor.
With ferruled conductors, it is necessary to use a terminal block one size smaller than the conductor's nominal cross-section.
Commoning

Commoning
Distributing current to several fuse-protected circuits via insulated push-in type jumpers.
Testing

Voltage test, either at input or output with fuse holder in closed position (live)

Through test with fuse holder in open position (no voltage)

Voltage test at input in the test slot of the current bar

Testing voltage at the output via separate test slot.

Measuring current between jumper slot and separate test slot.

Testing voltage (input side) via test plug adapter (280-404, shown) or test plug (281-407).

5 x 20 mm, 5 x 25 mm and ¼" x 1" fuse holders are fitted with stops on the inside of the cover.

Security

Touch-proof protection in all positions of the fuse holder

Fuse holder will remain safely locked open in vertical assemblies.

Locking system

Ganging several fuse holders with an interlocking link (example shows 8 mm wide terminal blocks).

Application

Fuse replacement:
Before replacing a fuse, pivot the fuse holder into the locked open position.

Fuse replacement:
One end of the fuse is automatically ejected from the holder when opening the cover.

Fuse replacement:
Easily removing a fuse by hand.

Fuse replacement:
Insert a new fuse and snap the cover closed.

Storing a spare fuse (fuse holder without blown fuse indication) for the types of fuses 5 x 20 mm, 5 x 25 mm und 5 x 30 mm.
Fused disconnect or disconnect terminal blocks with a width of 8 mm can be assembled adjacently. At the end of an assembly, or if there is **no** adjacent fused disconnect or disconnect terminal block, an end or intermediate plate must be used.

Marking

All fuse holders are printed with correct fuse size.

Each fuse holder features two marker slots for custom WMB Multi markers (example shows 8 mm wide terminal blocks).
