Before first use

Before getting started with this product, it is advisable to check the order completeness and any damage. If this is the case, please contact Tronix Lighting.

Description

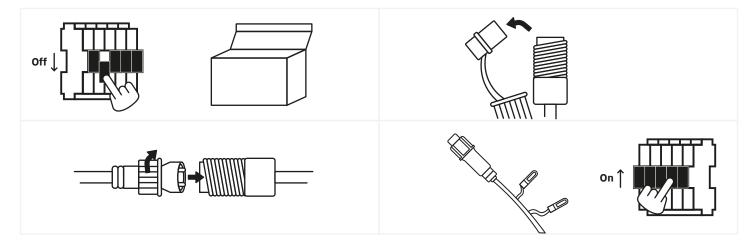

PS230 is a distinctive system within the world of professional LED lighting. The system contains countless possibilities when it comes to creating your own lighting design.

Whether decorating a house, restaurant or store, the system is called a solution for everything!

Features

- IP65 for outdoor use;
- High-quality composition of materials for long life;
- Up to a maximum of 50 meters in one coupling.

Installation

- 1. Turn off the power and remove the product and associated parts from the packaging;
- 2. Unscrew one or both caps and connect the female connector to the corresponding PS230 plug;
- 3. Check that the connection is okay and then screw cap back over plug. This ensures a water-resistant seal. When looping through, please connect the next set to the end of the current set;
- 4. Check the complete installation. If everything is OK, you can reactivate the power.

Safety

Safety is a top priority at Tronix Lighting. Therefore, we heartily recommend that you follow the following steps closely:

- Keep this manual carefully for future reference;
- Choose a qualified electrician while installing, maintaining or inspecting this product;
- Never look directly into a light source to avoid possible eye damage;
- Ensure that the respective power group is always on non-active when the product is connected;
- Use only recommended combinations (LED drivers, controllers or dimmers) to avoid injury or damage to the product;
- The light sources of this product is not replaceable. Because of this, you must replace the entire fixture towards the end of its lifespan and it is not recommended to open it.

Technical problems and repair

Should a product not work properly after installation, or if the product exhibits problems over time, it is advisable to check the following elements:

- Check the wiring and installation of your product;
- Check for the presence of interfering elements such as dust, water or other electronics;
- If possible, try disconnecting the product and testing it in another location to rule out a problem at the location;
- Should you be dealing with a WIFI-based product, check and reset your router's settings.

Should the product still not work after testing, it is recommended to send it in for inspection and/or repair. To do so, please contact Tronix Lighting using nearby details and proof of purchase (packing slip).
