

ABB EcoSolutions™ – AK600

AK600 – wall mounted consumer unit

The AK600 series offers new possibilities in terms of application areas, flexibility and design. Its product portfolio includes 2 kinds of enclosures – if it's the standard version for DIN-Rails or the media version for Wi-Fi routers. It is mainly designed for residential and small commercial applications.

Thanks to its customization options you can turn it into an attractive design feature in your home. For both wall-mounted (AK600) and flush-mounted (UK600) consumer units, the same accessories can be used to reduce stock keeping efforts.
