**TRONIX**

# Before first use

Before getting started with this product, it is advisable to check the order completeness and any damage. If this is the case, please contact Tronix Lighting.
# Description

Light snakes can be used year-round because of their versatility and durability. They are ideal for lighting a pool or patio, as bar decorations, accent structures or any other indoor or outdoor accent lighting.

**Features**

- Vertical LED structure
- LED type DIP LED
- Includes power cord (schuko EU plug)
# Installation

1. Remove the product and associated parts from the packaging. Remove the strip from the reel before using it;
2. Check the set you are using and then cut the light hose to size using the mark on the hose;
3. Attach the light hose using clips (485-060) or a profile (485-160, 485-165 and 485-170). Make sure you have enough space when the light hose goes through a bend. Bend main cores only at right angles to avoid damage;
4. Check the installation and finish the light hose using the termination cap (glue it in place). Then connect the plug to complete the set.

## Safety

Safety is a top priority at Tronix Lighting. Therefore, we heartily recommend that you follow the following steps closely:

- Keep this manual carefully for future reference;
- Choose a qualified electrician while installing, maintaining or inspecting this product;
- Never look directly into a light source to avoid possible damage to the eye;
- Always ensure that the relevant power group is on non-active when the product is connected;
- Use only recommended combinations (LED drivers, controllers or dimmers) to avoid injury or damage to the product.

## Technical problems and repair

Should a product not work properly after installation, or if the product exhibits problems over time, it is advisable to check the following elements:

- Check the wiring and installation of your product;
- Check for the presence of interfering elements such as dust, water or other electronics;
- If possible, try disconnecting the product and testing it in another location to rule out a problem at the location;
- Should you be dealing with a WIFI-based product, check and reset your router's settings.

Should the product still not work after testing, it is recommended to send it in for inspection and/or repair. To do so, please contact Tronix Lighting using nearby details and proof of purchase (packing slip).
