

ABB EcoSolutions™ – INS-E3

InSite pro M compact – INS-E3

Equips the main control unit (SCU200, SCU200-W) with metering capabilities and can measure all important variables of mains supply like current, voltage, powerfactor, current quadrant etc. It is possible to connect specific split core transformers (INS -CTX) with a rated current measurement capabilities of upto 80A. The data collected can be viewed on the SCU200's main web server and used for basic data export or advanced features like full energy monitoring, management of tariffs, and setting alarms.

Solutions™

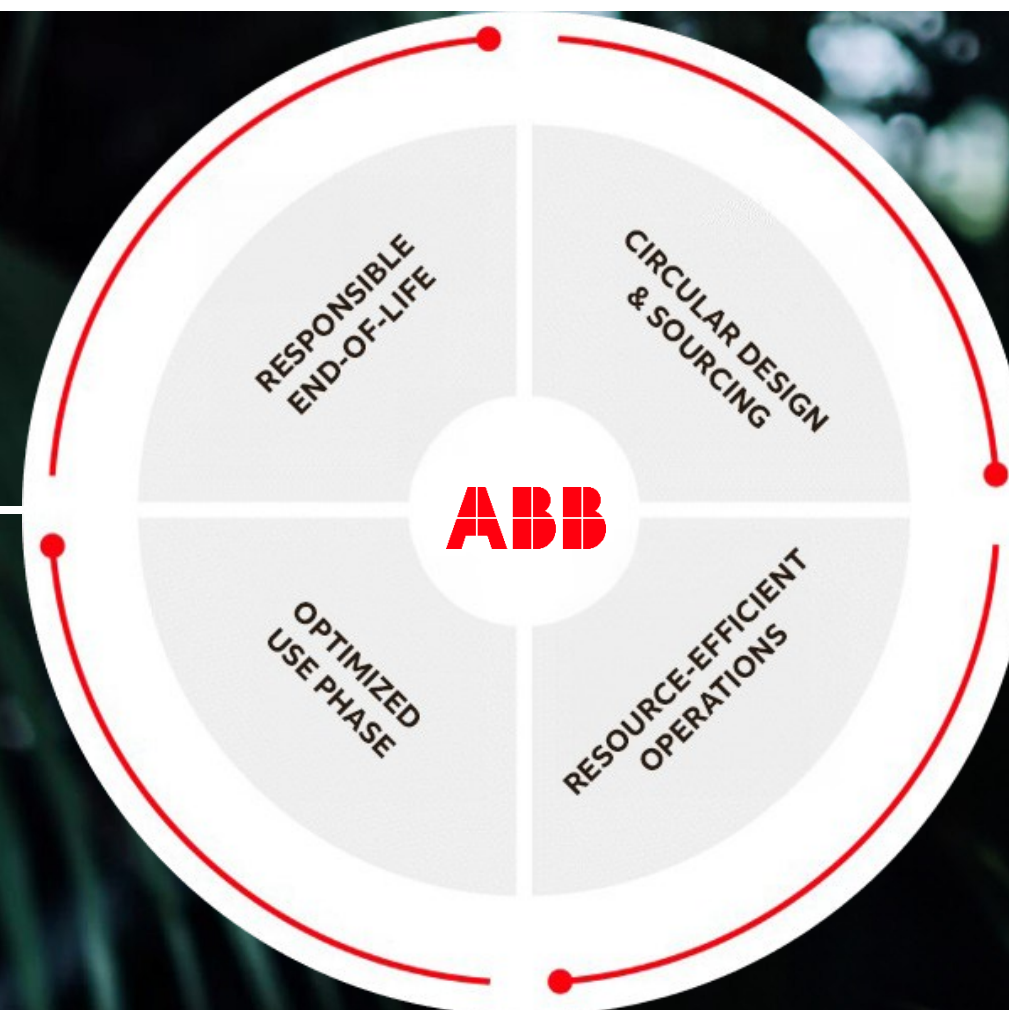

End-of-life instructions

Clear instructions for product disassembly and recycling individual parts for re-use. ([LINK](#) to the document)

Enhanced durability

Through digital innovation and robust design, INS-E3 optimizes customer processes and extends asset lifetime, ensuring efficiency and resilience with a sustainable approach

Designed for high recyclability & lower material use

Up to **46.25%** recyclability rate, calculated according to EN 45555.

Produced in a zero waste to landfill site

All non-hazardous waste is recycled, and we continuously work to minimize waste in our operations.

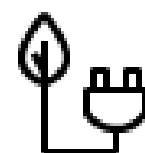

Sustainable packaging materials

Packaging is made of **95% recycled paper**.

Third-party verified Environmental Product Declaration

EPD compliant with ISO 14025 Type III (externally verified), ensuring data accuracy and full transparency on the product's environmental impacts throughout its life cycle ([LINK](#) to the EPD).

Low-carbon manufacturing

This product is manufactured in an ABB facility that is powered by renewable energy.
