

# ABB EcoSolutions™ – INS-WM

## InSite pro M compact – INS-WM

The INS-WM is a wireless M-Bus communication module for the InSite system, enabling the integration of up to 32 wireless M-Bus meters into the SCU200 control unit. Acting as a wireless gateway, it allows meter data to be collected and managed directly through the InSite webserver. The module features tool-free plug-in installation and is automatically detected and configured by the system, simplifying commissioning. Integrated status LEDs provide immediate visual feedback, while the external antenna connection ensures reliable wireless communication across different installation environments.

### End-of-life instructions

Clear instructions for product disassembly and recycling individual parts for re-use. ([LINK](#) to the document)

### Enhanced durability

Through digital innovation and robust design, INS-WM optimizes customer processes and extends asset lifetime, ensuring efficiency and resilience with a sustainable approach

### Designed for high recyclability & lower material use

Up to 46.25% recyclability rate, calculated according to EN 45555.

### Produced in a zero waste to landfill site

All non-hazardous waste is recycled, and we continuously work to minimize waste in our operations.

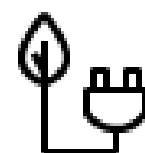

### Sustainable packaging materials

Packaging is made of 95% recycled paper.

#### Third-party verified Environmental Product Declaration

EPD compliant with ISO 14025 Type III (externally verified), ensuring data accuracy and full transparency on the product's environmental impacts throughout its life cycle ([LINK](#) to the EPD).

#### Low-carbon manufacturing

This product is manufactured in an ABB facility that is powered by renewable energy.
