

## Elma BM037 TRMS AC/DC clamp multimeter

0-600A AC/DC with temperature measurement

Elma BM037 is a small and handy clampmeter designed for measuring True RMS AC and DC currents. Using this handy clamp multimeter, it is possible to measure currents as high as 600A. The multimeter function offers measurement of voltage, current, capacity, resistance and continuity. Besides the clamps function, the instrument is also measuring 0-2000 micro amperes on the sockets. Furthermore the instrument is equipped with temperature measurement, capable of measurements using standard type k sensor, for measuring numerous applications. The AmpTip function provides the opportunity to measure currents from 0-60A with enhanced accuracy.

Elma BM037 is equipped with back lit display, min/max/rel, peak hold and voltage detection. Elma BM037 fulfills IEC 61010-1 CAT III 600V and CAT IV 300V and is delivered ready to use in bag including test leads, temperature sensor, battery and user manual.
