

Zehnder Group Zwolle REACH Compliance and Requirements

Every participant in the supply chain has to pass information on any substances of very high concern (SVHCs) required by Article 33 of the EU Chemicals Regulation (1907/2006, REACH). This concerns SVHCs present in its products at a concentration of more than 0.1% weight by weight (w/w).

The REACH regulation requires the chemical substances themselves, not the end products, that need to be registered.

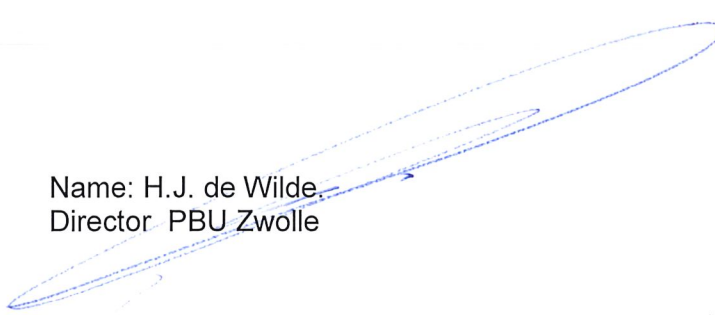

As a manufacturer of heat recovery and ventilation units, we are a traditional downstream user.

The products we supply are REACH compliant. This means that all relevant substances are:

- Excluded from the regulation, and/or
- Exempted from registration, and/or
- Have been pre-registered and/or have been registered.

This statement applies to all product lines from Zehnder Group Zwolle
