RF receiver, potential free, 1 changeover contact, flush mounting

410-00332

4 year warranty

This flush-mounted receiver allows switching an electrical device ON and OFF using a wireless Easywave button or a wired button. This receiver has a potential-free changeover relay contact, suitable to control devices such as a doorbell or a dimmer.

It can receive signals from a Niko Easywave hand-held transmitter and/or wireless switch. The receiver can be installed behind a Niko blind plate or push button in the colour of your choice. Please note that the combination with the push button requires a wall mounting box with an installation depth of minimum 50 mm. Up to 32 transmission codes can be programmed into the receiver. The receiver is equipped with either 1-button operation (ON/OFF, DEAD MAN, TIMER) or 2-button operation (ON/OFF, LOGIC).

Technical data

RF receiver, potential free, 1 changeover contact, flush mounting

- Radiated power: 6.38 mW
- Modulation: FSK
- Input: 1 external push button
- Output: 1 potential-free relay contact (changeover)
- Power consumption (stand-by): 0.3 W
- Power consumption without load: 0.8 W
- Maximum contact load:
- resistive load $\cos = 1: 10 \text{ A} / 2300 \text{ VA (N.O.)}, 6 \text{ A} / 1380 \text{ VA (N.C.)}$
- inductive load cos = 0.8: 3 A / 690 VA (N.O.), 2 A / 460 VA (N.C.)
- Not compatible with Niko Home Control (wireless bridge or wireless smart hub)
- Input voltage: 230 Vac \pm 10 %, 50 Hz
- Maximum MCB rating: 10 A (limited by national installation rules)
- Communication protocol: Easywave
- Operating frequency: 0.8683 GHz
- Ambient temperature: -20 +45 °C
- Protection degree: IP20
- Weight: 31 g
- \bullet Wire capacity: $-1 \times 2.5 \text{ mm}^2$ per connection terminal
- Marking: CE
