### Short description

Self-regulating heating tape for pipes/gutters, 25W/m

### Product Description

The eTRACE-25-PRO self-regulating heating tape is suitable for temperatures up to 80 °C and can be used both as pipe trace heating and gutter heating. They are suitable for use in both domestic and industrial applications. The supply conductors are nickel-plated copper. All heating tapes are moisture-proof and UV-resistant. The right prerequisite for a long service life and absolute reliability. As self-regulating heating tapes, they can simply be cut to the required length and used immediately. Also suitable for plastic gutters in the gutter heating sector. As pipe trace heating, primarily as frost protection or for maintaining a constant temperature on pipes and containers. Nominal output 25 W/m at 10 °C in air, max. ambient temperature: 80 °C switched off and 65 °C switched on, min. installation temperature: -50 °C, min. bending radius: 25 mm, test mark: NEMKO, CE compliant.
