## RoHS-Statement

### Restriction on the use of certain hazardous substances according to EU Directive 2011/65/EU and 2015/863/EU

The materials we use for the production of our products comply with the current guidelines of the EU Directive 2011/65/EU as well as the extension 2015/863/EU of the European Parliament for restriction of the use of certain hazardous substances in electrical and electronic devices (RoHS Directive) and fulfil the legal regulations of placing substances on the market.

We confirm that all products supplied by KAISER, with reference to the aforementioned directives, comply with the requirements for the following percentages by mass and/or that no such substances are released during the assembly of our products:

Lead (0.1 %)

Mercury (0.1 %)

Cadmium (0.01 %)

Hexavalent chromium (0.1 %)

Polybrominated biphenyls (PBB) (0.1%)

Polybrominated diphenyl ethers (PBDE) (0.1 %)

Di(2-ethylhexyl) phthalate (DEHP) (0.1 %)

BBP Benzyl butyl phthalate (BBP) (0.1%)

Butyl benzyl phthalate (DBP) (0.01 %)

Di-isobutyl phthalate (DIBP) (0.1 %)

### Exceptions apply to the following products:

- We hereby inform you that our radiation protection box „containing lead“ (article 9074-03) contains the substance lead > 0.1 mass percent. The lead contained is necessary to ensure the increased radiation protection against medically used radiation in lead-laminated walls despite the installation. However, when properly processed according to our specifications, the lead component is harmless to health, as skin contact is not possible.

- Further, we hereby inform you that our brass cable glands as well as the accessories, made of the material brass (e.g.: CuZn39Pb3), contain more than 0.1 mass percent of the material lead as an alloying component. These products use exemption 6C to comply with the regulation. Additions and findings are taken into account by us and periodically included in our assessment. Kaiser / AGRO use state-of-the-art materials and processes for new developments and take ongoing developments into account.

**Notice:** Excluded are the product groups: AgreenO and the EVolution EMC. These are made of lead-free brass (lead content < 0.1%).

If you need any further information, please let us know. We will be glad to assist you.

Kind regards
