EATON

Powering Business Worldwide

We make what matters work.*

At Eaton, we believe that power is a fundamental part of just about everything people do. That's why we're dedicated to helping our customers find new ways to manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. To improve people's lives, the communities where we live and work, and the planet our future generations depend upon. Because this is what really matters. And we're here to make sure it works.

NH Fuse links overview

Introduction and NH Fuse links' selection criteria

Introduction

Eaton's Bussmann® series NH fuse links use the latest technology to provide class leading fuse link performance and reliable indication. With a unique patented dual indicator design capable of operating a microswitch for remote fuse indication, Eaton provides one of the most reliable solutions available.

The range is fully compliant with IEC 60269-1 and 2 standards, with VDE 0636-2 third party approval and complies with the dimensional requirements of DIN 43620 for ease of use.

In order to help select the correct product for an application, Eaton provides the following application notes.

NH Fuse links' selection criteria

Selecting the correct product

Before making a fuse link selection the following information should be known about the system or circuit to be protected.

Type of application (cable protection/ motor protection)

For general applications or cable protection, the standard gG (general purpose) NH fuse link should be considered. For Motor protection applications, the aM (motor protection) NH fuse link should be considered. Motor Protection (aM) fuse links have partial range breaking ability and cannot clear low overload faults. They should only be applied to circuits also protected by a motor protection relay or where only high short-circuit faults could occur.

Note: Please note that misapplication of a fuse link can be problematical, consult Eaton if there is any doubt over fuse link selection.

System voltage

Eaton's Bussmann series NH fuse links are available in three voltage ratings, 400 V, 500 V and 690 V. These are maximum voltage ratings and should not be used where the nominal system voltage could exceed the fuse link's maximum rating.

Full load current

In accordance with IEC standards, Eaton's Bussmann series NH fuse links are tested to carry full load current. The current of a fuse link should be equal or greater than the operational current of the circuit and equal or smaller than the continuous current carrying capacity of the conductor.

The standard gG (general purpose) NH fuse link with a conventional fusing current of 1.6 times current will give assured cable protection against the effects of overcurrents.

Non-fault overload currents (motor inrush currents etc)

To prevent nuisance operation of the fuse link, the fuse link rating selected for the application should take into account any non-fault overload currents. Please refer to the time-current curves in the Catalog.

Possible fault conditions and maximum short-circuit current

This information is essential in order to select the fuse link that would provide the best possible protection under all fault conditions. Eaton's Bussmann series NH fuse links have a maximum breaking capacity of 120 kA and should never be used on a system where the maximum short-circuit current exceeds this level. Please refer to the time-

current curves in the Catalog.

Time-current curves

The time-current curve is probably the most useful piece of all fuse link data available. It allows you to determine how quickly the fuse link will operate under fault conditions and which fuse link will not operate under non-fault overload currents.

To use the curve simply plot the prospective Root Mean Square (RMS) fault current along the X axis and draw a line vertically upwards from this point. Where this point intersects the fuse curve line, plot a line across to the Y axis for the relevant rating. The Y axis shows the nominal operating time for the fuse in seconds. Hence, it shows how quickly the fuse link will operate under different fault currents.

The graph can be used to check if a fuse link can withstand an overload condition that is not considered to be a fault such as a direct-on-line (DOL) motor start. For example, if a motor starts and the inrush current is six times the full load current for 10 seconds, the exact point can be plotted onto the time-current curve.

Any fuse link line lying to the right of this point will withstand the motor start current (allowing for a +/-10% tolerance on each fuse link curve). If the fuse link curve falls to the left of this point, then the fuse link will not withstand the motor start current and will inadvertently

operate when the motor is started.

In summary, the rule for time-current curves is that any point on or to the right of a fuse link curve would indicate the fuse link has operated in the given time. Any point to the left of the curve would indicate the fuse link has not operated.

I^2t values

I^2t values are measured at the time of testing the fuse link at their rated breaking capacity and voltage. I^2t is effectively the amount of heating energy the fuse link will allow to pass during fault clearing at high short-circuit faults. I^2t values relevant for short-circuit faults cannot be calculated from the time-current or cut-off curves.

The published I^2t figures always show two values, pre-arcing/total clearing and are representative of the area under the first half cycle of the fault current.

- The pre-arcing value is the area under the first half cycle of fault current showing on the graph in yellow to the point just before an arc occurs within the fuse link. This is due to the element material being vaporised by the very high short-circuit current.
- The total clearing I^2t is the yellow and green area

under the first half cycle from the start of the short-circuit current flow to the point where the fuse link has become an insulator, completely isolating the flow of current.

The diagram here shows a representation of I^2t during a half cycle of fault current.

I^2t values give a good representation of the speed of operation of a fuse link. A small I^2t value would indicate a very fast-acting fuse link whereas a large I^2t value would indicate a fairly slow operating fuse link. In all cases the total clearing I^2t value of the fuse link must be smaller than the I^2t value of the device to be protected in order for the fuse link to provide adequate protection against short-circuit faults. For fuse link discrimination (see definition of discrimination below) in distribution systems, the

total clearing I^2t value of the fuse link downstream should be less than the pre-arcing I^2t value of the fuse link upstream. This ensures the smaller fuse link, in the system operates well before the larger upstream fuse link.

NH discrimination

Eaton's Bussmann series NH fuse links are easy to use on distribution networks where discrimination between large and small fuse links are required. This can be achieved by applying a discrimination factor of 1 to 1.6 without the need to check the fuse link data. For example, by using a 100 A fuse link downstream from the main 160A fuse link, in the event of a fault condition, the smaller 100A fuse link is sure to operate before the 160A fuse link, ensuring discrimination.

DC applications

Eaton's Bussmann series NH fuse links can be used on DC applications. In all cases the fuse links can be used at half of their AC rating with a time constant of no more than 10mS. The time constant is the rate of rise of fault current and should be as close to a 50Hz AC half cycle as possible.

Power loss

Every effort is made to ensure the power loss of the fuse link is kept to a minimum. Eaton provides fuse links with some of the lowest power losses in the industry. Power loss of the fuse link is given off as heat and this should be taken into account when fitting fuse links into unventilated areas. It is preferable that a fuse link has good airflow around the body of the fuse link to ensure cool running and prevent nuisance operation of the fuse link due to thermal stresses.

NH Fuse links overview

NH Fuse links applications

NH Fuse links' applications

NH Dual indicator system from Eaton

- High breaking capacity
- 400, 500 and 690 V a.c.
- Dual indication
- Insulated tag variants option available
- IEC 60269-1 and 2, DIN 43620, VDE 0636-2, CE Mark.

Features of the NH DIN range

Dual indicator system

Eaton's patented dual indicator system provides clear indication, ensuring extremely reliable local and remote* signalling, decreasing fuse link replacement time and costs.

*with the use of an optional microswitch accessory

Low power loss

Eaton's Bussmann series "low watts loss" fuse links reduce overall operating costs and carbon footprint through lower energy consumption and heat transfer to equipment. To find out how much you can save, please contact our technical applications department: buletechnical@eaton.com.

Globally compliant

Eaton's Bussmann series NH fuse links are tested and comply with IEC 60269-1 and 2, DIN 43620, VDE, CE, CCC (China), RoHS and can be recycled, ensuring global acceptance.

Lead and cadmium free

Eaton is the world's first true manufacturer of a complete range of Lead and Cadmium free NH fuse links. Negating any legislation concerns regarding the amount of hazardous materials permissible within the fuse links.

Recycling

Eaton is dedicated to produce recyclable products and is a member of an industry recognised recycling scheme. The "HRC" symbol on Eaton's Bussmann series NH fuse links define the product suitable for recycling, limiting disposal cost.

Ordering key

Current rating	100

400 V a.c. - class gFF - 2 to 630 amps - sizes 000 to 3

Description

Eaton's Bussmann series NH 400 V a.c. gFF fuse links have been designed for the protection of low voltage installations where expected short circuit currents are low.

Catalog numbers structure

(amp)NHFF(size)BI-400 e.g. 50NHFF000BI-400 with insulated metal gripping lugs

Class of operation

- gFF

Standards / approvals

- IEC 60269 part 1
- Dimensionally in accordance to IEC 60269 part 2 and DIN 43620 part 1 and 3

Technical data

- Sizes: 000, 00, 1, 02, 2 and 3
- Voltage: 400 V a.c.
- Current: 2 to 630 A
- Rated breaking capacity: 120 kA, 80 kA for NH00 80 A and 160 A
- Rated frequency: 50Hz

Optional microswitch

NH Fuse body size	Suitable microswitch
Size 000	170H0236
Size 00	170H0236
Size 1	170H0236
Size 02	BVL50
Size 2	170H0235 or 170H0236
Size 3	170H0235

Compatible fuse holders

Description	Type	Data sheet number
Fuse bases 1-pole	DIN-Rail mounting SD-D	10163
	Screw mounting SD-S	10163
Fuse bases 3-pole	DIN-Rail mounting TD-D	10163
Fuse bases accessories	IP20, Shroud and phase barriers kits	10163
Fuse rails	Vertical - EBF	10240
Fuse switch disconnectors	Vertical - EBV	10275
	Horizontal - EBH Size 000	10292
	Horizontal - EBH Size 00 to 4	10293

Environmental

- Recyclable
- RoHS compliant
- Lead and cadmium free.

Packaging

- All fuse links are packed in threes.

Features:

- Reliable dual indicator system
- Ideal for utility network protection, especially in large rural areas
- Low temperature rise

* I₁ is the maximum breaking capacity test at voltage according to IEC 60269-1 and 2 requirements

400 V a.c. - class gG/gL - 2 to 630 amps - sizes 000 to 3

Description

A square bodied range of industrial fuse links for a wide variety of applications.

Catalog numbers structure

- (amp)NHG(size)B-400
e.g. 100NHG02B-400
with conducting metal gripping lugs
- (amp)NHG(size)BI-400
e.g. 100NHG000BI-400
with insulated metal gripping lugs

Class of operation

- gL/gG.

Standards / approvals

- IEC 60269-1 and 2, VDE 0636, DIN 43620 and CE.

Technical data

- Sizes 000 to 3
- Voltage: 400 V a.c.
- Current: 2 to 630 A
- Rated breaking capacity: 120 kA AC
- Rated frequency: 50Hz
- Operating frequency: 45-62Hz.

Optional microswitch

NH Fuse body size	Suitable microswitch
Size 000	170H0236
Size 00	170H0236
Size 01	170H0235
Size 1	170H0236
Size 02	BVL50
Size 2	170H0235 or 170H0236
Size 03	BVL50
Size 3	170H0235

Compatible fuse holders

Description	Type	Data sheet number
Fuse bases 1-pole	DIN-Rail mounting SD-D	10163
	Screw mounting SD-S	10163
Fuse bases 3-pole	DIN-Rail mounting TD-D	10163
Fuse bases accessories	IP20, Shroud and phase barriers kits	10163
Fuse rails	Vertical - EBF	10240
Fuse switch disconnectors	Vertical - EBV	10275
	Horizontal - EBH Size 000	10292
	Horizontal - EBH Size 00 to 4	10293

Environmental

- Recyclable
- RoHS compliant
- Lead and cadmium free.

Packaging

- All fuse links are packed in threes.

Features:

- Reliable dual indicator system
- Low temperature rise
- Globally compliant.

400 V a.c. - class gG/gL - NH Fuse links

500 V a.c. - class gG/gL - NH Fuse links

Overview

500 V a.c. - class gG/gL - 2 to 1250 amps - sizes 000 to 4

Description

A square bodied range of industrial fuse links for a wide variety of applications.

Catalog numbers structure

- (amp)NHG(size)B e.g. 100NHG01B.

Class of operation

- gL/gG.

Standards / approvals

- IEC 60269-1 and 2, VDE 0636, DIN 43620 and CE.

Technical data

- Sizes 000 to 4
- Voltage: 500 V a.c.
- Current: 2 to 1250 A
- Rated breaking capacity: 120 kA AC
- Operating frequency: 45-62Hz.

Optional microswitch

NH Fuse body size	Suitable microswitch

Description

A square bodied range of industrial fuse links for a wide variety of applications.

Catalog numbers structure

- (amp)NHG(size)B-690 e.g. 2NHG000B-690.

Class of operation

- gL/gG.

Standards / approvals

- IEC 60269-1 and 2, DIN 43620 Part 1 and 3.

Technical data

- Sizes 000 to 4
- Voltage: 690 V a.c.
- Current: 2 to 800 A
- Rated breaking capacity: 120 kA
- Operating frequency: 45-62Hz.

Optional microswitch

NH Fuse body size	Suitable microswitch
Size 000	170H0236
Size 00	170H0236
Size 1	170H0236
Size 2	170H0235 or 170H0236
Size 3	170H0235
Size 4	Not available

Compatible fuse holders

Description	Type	Data sheet number
Fuse bases 1-pole	DIN-Rail mounting SD-D	10163
	Screw mounting SD-S	10163
Fuse bases 3-pole	DIN-Rail mounting TD-D	10163
Fuse bases accessories	IP20, Shroud and phase barriers kits	10163
Fuse rails	Vertical - EBF	10240
Fuse switch disconnectors	Vertical - EBV	10275
	Horizontal - EBH Size 000	10292
	Horizontal - EBH Size 00 to 4	10293

Environmental

- Recyclable
- RoHS compliant
- Lead and cadmium free for sizes 000 to 4 (2 to 1250A).

Packaging

- Sizes 000 to 3: 3 per carton
- Size 4: 1 per carton

Features:

- Reliable dual indicator system (size 4 single indication only)
- Low temperature rise
- Globally compliant
- UL on limited ratings.

690 V a.c. - class gG/gL - NH Fuse links

Description

Eaton's Bussmann Series NH gG fuse links are designed to ensure cable protection up to 800 V a.c.

They are also ideally suited for the cable protection on the AC side of solar string inverters with outputs up to 800 V a.c.

Optional microswitch

- BVL50
- 170H0235
- 170H0236

Environmental

- Recyclable
- RoHS compliant
- Lead and cadmium free

Catalog numbers structure

- (amp)NHG(size)B-800 e.g. 32NHG1B-800.

Class of operation

- gL/gG.

Standards / approvals

- IEC 60269-1 and 2, DIN 43620 Part 1 and 3.

Technical data

- DIN Style NH 00, 1, 2 and 3
- Voltage: 800 V a.c.
- Current: 2 to 315 A
- Rated breaking capacity: 80 kA
- Operating frequency: 45-62Hz.

Features:

- Reliable dual indicator system
- Low temperature rise

500 and 690 V a.c. - class aM - NH Fuse links

Overview

Description

A range of class aM square bodied industrial fuse links for a wide variety of motor protection applications.

Catalog Numbers structure

- 500 Volts: (amp)NHM(size)B
- 690 Volts: (amp)NHM(size)B-690.

Class of operation

- aM.

Standards / approvals

- IEC 60269-1 and 2, DIN 43620 Part 1 and 3.

Technical data

- Sizes 000 to 3
- Voltage: 500 and 690 V a.c.
- Current: 6 to 500 A
- Rated breaking capacity: 120 kA
- Operating frequency: 45-62Hz.

Optional microswitch

NH Fuse body size	Suitable microswitch
Size 000	170H0236
Size 00	170H0236
Size 1	170H0236
Size 2	170H0235 or 170H0236
Size 3	170H0235

Compatible fuse holders

Description	Type
Fuse bases 1-pole	SD(size)-D DIN-Rail mounted
	SD(size)-S: Screw mounting
Fuse bases 3-pole	TD(size)-D, DIN-Rail mounted
Fuse bases accessories:	IP20, shroud and phase barrier kits
Fuse rails	vertical: EBF series
Fuse switch disconnectors	vertical: EBV series
	horizontal: EBH series

Environmental

- Recyclable
- RoHS compliant
- Lead and cadmium free.

Packaging

- All fuse links are packed in threes.

Features:

- Reliable dual indicator system (except size 2, 315 and 355 A which are single indication)
- Low watts loss
- Metal gripping lugs.

NH Fuse bases and accessories for 400, 500 and 690 Volts NH Fuse links

Description

NH fuse bases with thermoplastic bodies, DIN rail and/or screw mounting (size 4 screw mounting only). Range of accessories including phase barriers, IP20 finger-safe protection kits and neutral links available.

Microswitch also available for remote signaling of fuse link operation.

Catalog numbers structure

- SD(size)-x 1-pole
- TD(size)-x: 3-pole.

Standards / approvals

- IEC 60269-1 and 2, VDE 0636-1 and 2.

Technical data

- Voltage: 690 V a.c.
- Current: 160 to 1600A
- Rated for fuse links with breaking capacity: 120 kA

Compatible fuse links

- NH 400, 500 and 690 V a.c. NH gG and aM fuse links

Packaging

- 1-pole: 3, SD4 and 3-pole: 1
- Packaging 100% recyclable

Features

- Complies with IEC 60269-1 and 2 fuse system A (NH base), manufacturers type test certificates of compliance available.
- 3-pole integral NH00 base available with reduced width.
- Clip-in phase barriers, terminal shrouds and fuse covers available.
- Vibration tested to IEC 60068-2-6 for marine use.

NH Fuse bases and accessories for 800 Volts NH Fuse links

Description

Eaton's Bussmann® series sizes 00 to 3 NH fuse bases are specifically designed for use with Eaton's Bussmann series NH 800 V a.c. fuse links ([data sheet TD134002EN](#))

Catalog numbers structure

- DIN-Rail and screw mounting: SD(fuse size)-D-800
- Screw mounting only: SD(fuse size)-S-800
- DIN-Rail and screw mounting without anti rotation terminal: SD(fuse size)-DA-800

Standards / approvals

- IEC 60269-1

Technical data

- Voltage: 800 V a.c.
- Current: 2 to 315 A
- Rated for fuse links with breaking capacity: 80 kA

Compatible fuse links

- NH 800 V a.c. gG fuse links

Packaging

- MOQ: 3
- Packaging 100% recyclable

NH Fuse rails - vertical - EBF

Overview and catalog numbers

NH Fuse rails - vertical - EBF series

Description

Eaton's Bussmann series NH Fuse rails are specifically designed to be used with NH Fuse links. All energized metal parts are fully protected against accidental contact. They are intended for direct installation on horizontal or vertical busbar systems.

Functionality

- Designed for installation onto 185 mm busbar systems, sizes 00,1,2 and 3
- Fuse rail width: size 00 - 50 mm, size 2,3 - 100 mm
- IP20 Touch protection
- EBF 00/100 mm fuse rails are designed for installation onto 100 mm busbar systems. Installation onto 185 mm busbar system is possible by using an adaptor

Catalog numbers structure

- EBF

Standards/ approvals

- IEC 60269-1 and CE.

Technical data

- Voltage: 690 V a.c.
- Current:
 - 160 A size 00
 - 400 A size 2
 - 630 A size 3

Compatible fuse links

- NH 400, 500 and 690 V NH gG and aM fuse links

Operating conditions

- Suitable for installation in environments free of any dust, explosive or aggressive gases.
- Altitude up to 2000 metre above sea level
- Can be used in outdoor environments if they are installed in IP34 cabinets
- Relative air humidity should not be higher than 50% temperature of +40°C
- Ambient temperature from -25°C to +55°C

Features

- Possible installation of various earthing devices
- Various options for cable terminations
- Wide range of accessories
- Touch protection IP20 with fuse shrouds

Packaging

- 1 per carton.

NH Fuse switch disconnectors - vertical - EBV

Overview

NH Fuse switch disconnectors - vertical - EBV series

Description

Eaton's Bussmann series NH Vertical fuse switch disconnectors are specifically designed to be used with NH fuse links. All energized metal parts are fully protected against accidental contact. They are suitable for direct installation on horizontal or vertical busbar systems. The three poles can be switched independently or simultaneously depending upon the version. These are manually operated switches and the making and breaking is dependent on the speed of the operation. The EBV series NH gear are provided complete with the clamps (i.e. screws/V-terminals/2V-terminals) and shrouds for cable termination.

Features

- Touch protection IP 30 from the front
- Top/bottom cable termination possibility
- Test holes provided on the cover to measure the voltage across the link
- Various options for cable terminations
- Wide range of accessories

Functionality

- Designed for installation onto 100 mm or 185 mm busbar system
- Making and breaking operation should be done with determined movement
- Parallel moving, double contact system
- Suitable for top cable termination connection

Catalog numbers structure

- EBV (see table below)

Standards/ approvals

- IEC 60947-1 and 3, EN 60947-1 and 3

Packaging

- 1 per carton

Technical data

- Voltage: 690 V a.c.
- Current: 160 to 910 A
- Utilisation category:
 - AC21B 690 V a.c. Size 3
 - AC22B 500 V a.c. Sizes 00 to 3
 - AC23B 400 V a.c. Size 00 to 3

Compatible fuse links

- NH 400, 500 and 690 V gG and aM fuse links

Busbar mounting options

- Size 00 NH gear are available in two versions suitable for installations onto 100 mm busbar and 185 mm busbar system. 100 mm rails can be installed on the 185 mm busbar system by using an adaptor
- Sizes 1,2 and 3 are suitable for installation onto 185 mm busbar system

Operating conditions

- Suitable for installation in environments free of any dust, explosive or aggressive gases
- Altitude up to 2000 metre above sea level
- Can be used in outdoor environments if they are installed in IP34 cabinets
- Relative air humidity should not be higher than 50% temperature of +40°C
- Ambient temperature from -25°C to +55°C

NH Fuse switch disconnectors - horizontal - EBH000

Overview

NH Fuse switch disconnectors - horizontal - EBH000

Description

Eaton's Bussmann series EBH000 NH Horizontal fuse switch disconnectors are specifically designed to be used with size 000 NH Fuse links up to 160 A. They have compact dimensions, all energized metal parts are fully protected against accidental contact. These are manually operated switches and the making and breaking is dependent on the speed of the operation.

Functionality

- Designed for installation onto mounting platess, 60 mm or 100 mm busbar systems
- Making and breaking operation should be done with determined movement
- Parallel moving, double contact system
- Suitable for top or bottom cable terminal connection

Features

- Touch for IP 30 from the front
- Top/bottom cable termination possibility
- Compact dimensions
- Test holes provided on the cover to measure the voltage across the link
- Various options for cable terminations
- Wide range of accessories

Catalog numbers structure

- EBH000 O on mounting plates
- EBH000 1 on 60 mm busbar systems

Standards/ approvals

- IEC 60947-1 and 3, EN 60947-1 and 3

Technical data

- Voltage: 690 V a.c.
- Current: 160 A
- Utilisation category:
 - AC21B
 - AC22B
 - AC23B
 - DC21B

Compatible fuse links

- Size 000 NH Fuse links up to 160 A

Packaging

- 1 per carton.

Mounting options

- On mounting plates: EBH000 O
- On to 60 mm busbar systems: EBH000 1

Operating conditions

- Suitable for installation in environments free of any dust, explosive or aggressive gases
- Altitude up to 2000 metres above sea level
- Can be used in outdoor environments if they are installed in IP34 cabinets
- Relative air humidity should not be higher than 50% temperature of +40°C
- Ambient temperature from -25°C to +55°C

NH Fuse switch disconnectors - horizontal - EBH00 to EBH4

Dimensions - mm

Dimensions (mm) for EBH1 suitable for installation on mounting platess

Screw terminals

V Clamps

Dimensions and spacing holes for installation on mounting platess

NH Fuse switch disconnectors - horizontal - EBH00 to EBH4

Dimensions - mm

Dimensions (mm) for EBH1 suitable for installation on 60 mm busbar

Dimensions (mm) for EBH1 suitable for installation on 100 mm busbar

NH Fuse switch disconnectors - horizontal - EBH00 to EBH4

Dimensions - mm

Dimensions (mm) for EBH2 suitable for installation on mounting platess

Screw Terminals

V Terminals

Dimensions and spacing holes for installation on mounting platess

NH Fuse switch disconnectors - horizontal - EBH00 to EBH4

Dimensions - mm

Dimensions (mm) for EBH2 suitable for installation on 60 mm busbar

Dimensions (mm) for EBH2 suitable for installation on 100 mm busbar

NH Fuse switch disconnectors - horizontal - EBH00 to EBH4

Dimensions - mm

Dimensions (mm) for EBH3

Dimensions (mm) for EBH4

General technical enquiries: buletechnical@eaton.com

Eaton is an intelligent power management company dedicated to protecting the environment and improving the quality of life for people everywhere. We make products for the data center, utility, industrial, commercial and institutional, machine building, residential, aerospace and mobility markets. We are guided by our commitment to do business right, to operate sustainably and to help our customers manage power - today and well into the future. By capitalizing on the global growth trends of electrification and digitalization, we're helping to solve the world's most urgent power management challenges and building a more sustainable society for people today and generations to come.

Founded in 1911, Eaton has continuously evolved to meet the changing and expanding needs of our stakeholders. With revenues of \$27.4 billion in 2025, the company serves customers in 180 countries.
